PROJECTS

DentalExperts — Django, Python, SQLite · suryacs.pythonanywhere.com

- Architected a full-stack CRM to automate dental appointment workflows and digitize patient records.
- Implemented online scheduling, clinic information pages, and management of patient records and doctor schedules.
- Deployed live on PythonAnywhere; formed the basis of a published research paper (see Publications).
- **Outcome:** Streamlined clinic operations and served as the primary subject for a published research paper.

Personal Portfolio — Next.js, Turso, Cloudinary · suryacs-websolutions.vercel.app

- Developed and deployed a cinematic personal portfolio site showcasing 10+ front-end and back-end technologies.
- Hosted live on Vercel with a focus on animation and responsive layout.
- Integrated SEO best practices and performance optimization for faster page loads and improved search engine visibility.
- **Outcome:** Increased professional online presence and showcased full-stack mastery to potential clients.

CipherApparel — Next.js, Turso · cipher-apparel.vercel.app

- Engineered a high-performance fashion e-commerce platform with dynamic product management and secure auth.
- Developed dynamic product listing and offers-management features powered by Next.js and Turso database.
- Utilized a full-stack Next.js and Turso architecture for a seamless, high-performance shopping experience.
- **Outcome:** Delivered a seamless, single-page shopping experience with sub-2 second load times.

Blogcraft — React.js, Turso · survacs-blogs.vercel.app

- Developed a robust content management system with role-based access control and efficient publishing workflows.
- Built post creation, editing, and management workflows for efficient content publishing.
- **Outcome:** Enhanced editorial efficiency by providing a structured environment for multi-user content creation.

Spice Kitchen — React-Vite, Supabase · spice-kitchen-veg-nonveg.vercel.app

- Developed a lightweight, responsive digital menu application to streamline the dining experience, featuring intuitive category browsing.
- Deployed on Vercel to ensure high availability and fast load times for end users.
- **Outcome:** Optimized the dining experience through contactless menu browsing and fast edge-network delivery.

Restaurant POS & Billing System — React.js, Turso · restaurant-pos-frontend-steel.vercel.app

- Built a cloud-ready Point of Sale system facilitating real-time order management, menu administration, and efficient checkout processes.
- Integrated Cloudinary for media management and Turso (LibSQL) for high-performance, scalable edge database operations.
- **Outcome:** Reduced checkout latency and centralized inventory management using high-performance edge databases.

Jarvis AI Assistant — Android · jarvis-official.vercel.app Download surya-cs.itch.io

- AI assistant for Android mobile phones.
- **Outcome:** Successfully implemented voice-recognition and automated tasks for mobile productivity.
